. . Foreword . .

After one of the hottest and driest summers on record, we have harvested a fair crop of roots to supply our many customers throughout the United States.

We are introducing a new "Gerrie Hoek" type cut flower in a rose-red color. It is sure to be as well liked as the other water lilly types.

We wish you all great success with your dahlias during the coming year.

NELS JOHNSON

. . Terms . .

Our terms are cash with an order, or prior to shipping time. Local customers who call for their orders in person can pay prior to or when picking up their roots.

Mail orders over \$2.50 are prepaid or if preferred we can ship C. O. D., the customer paying the C. O. D. charges. On orders under \$2.50, please add 25 cents for packing and postage.

Make checks or money orders payable to N. O. A. Johnson, Sumas, Wash. Customers living in Washington please add 4% for state sales tax.

Canadian customers must obtain import permits from the Plant Protective Division, Dept. of Agriculture, Ottawa, Ont.

All roots are guaranteed to be true to name and in good growing condition. If not found so, return same and a replacement will be made or money refunded.

Visitors are welcome to our dahlia fields during the blooming season from mid-August until first frost. The farm is located one mile north of the Nooksack Valley high school, at the intersection of the High School and the Clearbrook roads.

. . Cultural Directions . .

Dahlias will do very well in almost any kind of soil with a little careful attention. Select a place that is reasonably sunny. A little shade during a part of the day is all right, but never plant dahlias in a plot that is underlaid with tree roots. Dig a hole nearly a foot deep and into it put about half a shovel of well rotted manure or any complete fertilizer, and mix this thoroughly with the soil in the bottom of the hole, then put in enough top soil so the root will not come in direct contact with the fertilizer. Now you have a hole about six or eight inches deep. Now place your root and drive a strong stake near the sprout end of the dahlia root. By setting the stake now you will not injure the roots, which is likely by setting the stake after it is needed. Now cover the roots with only about two or three inches of soil. This will allow the sun to warm better than if the hole were filled. After the plant has emerged, more soil can be hoed in as the plant grows.

LITTLE CHARMER

Formal decorative; low bush; 24" size: a new water-lilly type dahlia that is between old rose and red. Excellent cut flower with strong stems and very well poised. Flowers should be cut while rather new as the old ones have a tendency to fade in the sun. Net.....\$2.00
